DETAILED ACTION

1. Applicant's 7/30/10 Amendment, which directly amended claim 1, submitted a Replacement Drawing, and traversed the rejection of claims in the 4/30/10 Office action, is acknowledged. With the exception of Rosewell, the examiner agrees that the amended claims define over the applied art.

Response to Arguments

2. Applicant traversed applied art, Rosewell, on the ground that the reference:

"fails to disclose a mixer including piping connecting to and extending from each of the compressed gas tank and the cooling water storage tank mixing inert gas supplied from the compressed gas tank with cooling water supplied from the cooling water storage tank as in the claimed invention." Underlining provided.

The examiner disagrees because the traverse is based on applicant's misinterpretation of his own claim language.

The claim limitation upon which applicant bases his traverse is as follows:

"a mixer including piping connecting to and extending from each of the compressed gas tank and the cooling water storage tank, the piping from the compressed gas tank and the piping from the cooling water storage tank being connected, thereby mixing inert gas supplied from the compressed gas tank with cooling water supplied from the cooling water storage tank." Underlining provided.

It appears that applicant alleges that Rosewell does not meet the "thereby mixing inert gas ..." limitation. The examiner disagrees.

The term, "thereby", is defined by the dictionary as "by that" or "by that means" (see Ref. U). Clearly, if one replaces "thereby" with "by that means" in the above limitation, the "that means" refers to the condition preceding the "thereby". The condition

Art Unit: 3663

stated after “thereby” is the result or consequence of the condition preceding the “thereby.”

In the previous Office action, the examiner has demonstrated that Rosewell meets the condition preceding the “thereby”, i.e., the piping connecting to and extending from each of the compressed gas tank and the cooling water storage tank, the piping from said respective tanks connected to each other. Thus, Rosewell also meets,

“mixing inert gas supplied from the compressed gas tank with cooling water supplied from the cooling water storage tank.”

Clearly, Rosewell meets all limitations of the claim, as presently set forth by the claim language.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over:

a) Rosewell (U.S. 4,310,385) alone or in view of either one of Kuljis et al. (U.S. 7,218,101) or Fife (U.S. 5,802,125).

The reasons are the same as those stated in section 7 of the 4/30/10 Office action, as further clarified in section 2 above, which reasons are herein incorporated.

Claim Objection

Art Unit: 3663

4. Claims 2, 3, 5, 6, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
